LOCAL GRAIN AND PRODUCE. Little New to Note in Local Markets and Prices Steady.

A talk with merchants in the different lines of trade showed that but few were doing as much business as they had anticipated in early December, but in most cases it is attributed to the mild weather now prevalent. Grocers, confectioners and druggists seem to be the most satisfled with the volume of trade, and all are quite busy. Merchants that handle holiday goods speak of trade as being fairly good. Both hide and leather markets are quiet with weak prices the feature. Pouliry is firm and eggs weak on large receipts. On Commission row the most complaint is heard. Fruits and vegetables are \$12.75; A, \$11.75; B, \$10.25. Double: AA, \$16; A, \$14.50; B, \$12.25. 26x34, 28x32 and 36x30 to 26x44—Single: AA, \$17.25; limited to immediate requirements. SOMEWHAT PESSIMISTIC REVIEWS BY DUN & CO. AND BRADSTREET'S.

Unsensonable Weather and Doubt About Action of Congress Have an Adverse Effect on Business.

NEW YORK, Dec. 11.-R. G. Dun & Co.'s weekly review of trade to-morrow will say: The approach of the holidays and doubt to clear away embarrassments which restrict them.

The wheat market has weakened with less gloomy news from other countries and larger Western receipts, though only 3,631,-374 bushels, against 6,003,404 bushels last year. Disappointment about the break in prices may help to increase receipts. Atlantic exports were but 2,755,651 bushels, flour included, and for the two weeks have been but 4,748,118 bushels, against 4,172,448 bushels last year. Pacific coast dispatches California. The market has declined 14c, and the decrease in demand for flour with high rail rates has closed nearly all the Superior-Duluth and many of the other

Northwestern mills. Cotton has declined 3-16c, and in spite of all the stories that the crop has been nearly marketed, continues to come forward steadily. With over 4,000,000 bales in sight already, there are estimates based on governor less, which would leave 3,300,000 bales to come forward in eight months and three weeks. When the official report first came there was a rush of buyers, a few minutes turned the current and a rapid decline fol-

The iron output for December was 142,278 tons weekly, against 124,077 tons Nov. 1, and 216,797 tons a year ago, and unsold stocks reported were 31,901 tons smaller than Nov. 1, but these do not include stocks of the great steel companies. The industry is for the time demoralized by uncertainty regarding the great combinations. The formal withdrawal of the Bellaire company broke the billet pool, but a meeting is in session to reconstruct it if possible. The beam-makers also meet this week to revive, if they can, their compact, and the steel rail works will meet shortly, with the prospect that an important concern will go out, and if others are kept together prices will have and the rupture of the nail association for the time left the bar price for wire nails about \$1.50 at Pittsburg, with extra charges on ordinary assortments averaging 12 cents, against \$2.55 paid last month, with extras averaging 70c. Until the future influence of Pork-Dec. these combinations is better defined, narrow trading must be expected, and Bessemer pig and gray forge are slightly lower. Minor metals are generally weaker, tin at 12,90c. copper at 114c for lake, and lead at 2.95c. Aluminium has been reduced from 50c to 37c for ingots, ton lots, and 65c to 53c for rods, production having increased fourfold. Textile industries are working a larger force than in October, but there is not much evidence of larger demand, and some kinds of goods are accumulating. As raw cotton is lower, some yielding in prices of staples is expected, and buying is on that account more restricted, a few qualities of account more restricted, a few qualities of goods having slightly declined. | Print cloths | are weak in tone, with enormous stocks. Woolen goods are not in better demand, and there is general indisposition to make commitments ahead. Sales of wool in two weeks, 14,378,900 pounds, against 11,999,200 pounds last year, and 10,952,700 pounds in barley, 79,000 bu. Shirments-Flour, 3,000 brls; 1892, are this year largely between traders, as the mills find at present little encouragement to buy, and London sales are a shade weaker. Quotations are not changed, though more frequent concessions are reported. Failures for the week have been 380 in the United States, against 333 last year, and 43 in Canada, against 54 last year.

Bradstreet's Review.

NEW YORK, Dec. 11.-Bradstreet's tomorrow will say: There has been no improvement in general trade this week, except in holiday specialties. Distribution of merchandise in Texas has been checked by those who have held back cotton, awaiting higher prices. Unseasonable weather has again delayed demand for winter goods, and the approach of the period for stock-taking will prolong the season of dullness well into next month. The tendency of prices is more conspicuously downward, noticeably for Bessemer pig iron, steel billets, rails, hides, leather, flour, wheat, corn, oats, lard, cotton and petroleum. Comparatively steady quotations are reported for raw wool, print cloths, lumber, pork and sugar. Coffee is higher. Many who have been extremely bullish as to wheat prices regard a reaction as likely, notwithstanding the outlook for greater firmness and higher quotations during the latter than in the first half of current cereal year. The collapse or impending dissoution of iron and steel pools or combinations encourages belief that prices for metals will range This causes buyers to withhold orders. Dry goods are depressed by the large stocks of print cloths in the hands of manufacturers and, although some New England woolen mills are well supplied with orders, there is no revival in woolen manu-

facturing. Some makers are waiting for the goods market to start up. Exports of wheat (flour included as wheat) from both coasts of the United States this week show a marked increase as compared with preceding weeks and corresponding weeks in preceding years, amounting to 4,222,714 bushels, contrasted with 3,653,000 bushels last week, 2,458,000 in he corresponding week last year, 2,536,000 in the week two years ago, 3,213,000 three years ago, and as compared with 3,277,000 in the corresponding week of 1892. Exports of Indian corn this week are also heavy, amounting to 3,541,288 bushels, twice as Rye steady at 35c bid. Barley steady. much as in the preceding week, nearly 50 meal, \$1.35. Bran dull; east track, 36@37c bid, per cent. more than in the corresponding sacked. Flaxseed higher at 75c, Prime timothy week last year, and very much more than seed, \$2.50. Hay steady; prairie, \$4@7.50; timweek last year, and very much more than in like weeks in three preceding years. There are 381 business failures reported in the United States this week, another increase as compared with the average in recent weeks; 22 more than last week, 67 more than in the like week one year ago. but two less than in the second week of December, 1894, although 44 more than in corresponding week in 1893. As compared with the like week in 1892 the increased number of failures this week is 83. There are 42 business failures reported throughout the Canadian Dominion this week, five fewer than last week, three more than in the week a year ago, eight more than two years ago, and four less than in

## GRAIN MARKET HIGHER

IN THE FACE OF BEAR NEWS WHEAT SCORED ADVANCE OF 1 1-SC.

Coarser Cereals Participated in the Strength, but Provisions Went Off. Pork Losing 15c.

CHICAGO, Dec. 11.-Wheat surprised itself to-day and disappointed its enemies report. The firmness of cables was perhaps the chief element of strength in causing an advance of 114c in the May option. Corn and oats shared the strength in a degree, advancing about 1/3c each. Provisions were weak and declined 71/2015c. Wheat took its opening strength from the

up to 79%c. Opening quotations from Liverpool showed a decline of %d, but a later cable, also received before the opening of the session here, showed a 1/2d recovery. Their general tone was decidedly bullish, one private cable from a well-known Liverpool house remarking that the decline had brought forward an active demand and expressed the opinion that prices had TRADE NOT IMPROVING touched bottom. Later cables reported a further advance, bringing prices from ½d higher for March to 1d higher for May and the closing prices of the day before. The Liverpool strength was said to be largely due to the bad report of the Argentine wheat crop. It was generally expected that the government crop re-port would exercise a very deport would exercise a very pressing effect on values. It showed that the crop sown last fall is not only 5 per cent. greater in area than harvested this year, but the condition is nearly perfect and indicates a yield of fully 100,000,000 bushels greater than gathered this year-providing always that neither condition nor acreage suffer any impairment. But the trade took the view that, considering all that the plant has got to encounter before the next harvest-eight months hence-present condition did not offer a very safe basis for future action. New York gave the best kind of confirmaabout the action of Congress has put off | tion to the improved tone of the foreign While industries have gained in working against cable acceptances of their previous the advance which took place after the opening and which was mostly maintained the effect that receipts there will be much smaller after Monday. Receipts at Minneapolis and Duluth to-day were 537 cars, compared with 969 a year ago, and Chicago received 48 cars, against 172 last year. Exports of wheat and flour from Atlantic seaports amounted together to the equivalent of 305,000 bushels. The closing public cables were rather disappointinasmuch as although Liverpool quoted futures advanced, spot California was 1d lower and No. 1 Northern 112d lower. Continental markets were generally firm. May show that exports continue very heavy, and about 300,000 tons more are available from greater part of the day, finally closing firm Corn was depressingly dull, although firm. The firmness was principally due to strong; brokers', 2.75c; exchange, 3@3.05c. Tin the advance in wheat, but got a slight infusion of that feeling from another day's receipts considerably smaller than yester-

day's estimates. Cables were lower. This and the narrowness of trading prevented any material advance. May opened unchanged at 25%@25%c and rose to 26c, closing steady at 25%@26c. While a fair business was transacted in oats, there was no such interest manifested as yesterday and the day before. Prices were confined to a narrow range and closed where they did yesterday, being influenced entirely by corn. May opened at from 20% to 20% c, sold to 20% @20% c, declined to 20% c and closed with sellers at

that price. Provisions took the opposite course to that of the day before. Local speculators who had a little profit in previous purchases were among the sellers. The packers also sold some, those of them whose chief business is with the United Kingdom doing the most of the selling. Heaviness increased near the end and the closing prices were at or about the lowest of the day. May pork closed 15c lower, at \$7.85; lard about 10c lower, at \$4.02\64.05; ribs about 10c lower, at \$3,971/ Estimated receipts for Saturday-Wheat, 11 cars; corn, 230; oats, 410; hogs, 20,000
